

N57 Designed As The Solution

Ken, 2018

As Artists, we want to see new, exciting, visual products that

entice us to play more, and to seek new and more rewarding

levels of interaction

As Programmers, we want to bring new capabilities and new technologies to

mobile users by tightly coupling our network, content, utilities,

applications & games with the mobile devices' native systems,

allowing for fast, media-rich experiences.
